Customer Problem Statement Template

This section defines the problem from the customer's point of view. For cosmetic product analysis, the goal is to understand what shoppers need before choosing skincare, makeup, and personal-care products.

A clear customer problem statement helps identify what matters most: safe ingredients, suitable products for skin type, reliable ratings, affordable price, and trusted brand information.

I am	Describe the cosmetic customer and their attributes.
I'm trying to	State what the customer wants to achieve.
But	Describe the barrier or problem.
Because	Explain the reason behind the problem.
Which makes me feel	Describe the customer emotion caused by the problem.

Filled Problem Statements for Cosmetic Product Analysis

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A budget-conscious skincare buyer	choose a safe and affordable product for my skin type	there are too many similar products with confusing labels	brands use technical ingredient terms and marketing claims without simple comparison	confused, doubtful, and afraid of wasting money
PS-2	A beginner makeup user / college student	find cosmetics that match my skin tone and daily routine	online shades, images, and reviews are not always reliable	lighting, skin tone differences, and incomplete product information make selection difficult	uncertain and nervous before purchasing
PS-3	A sensitive-skin customer	avoid products that may cause irritation, acne, or allergy	ingredient safety and fragrance information is hard to compare quickly	important details are scattered across product pages and not shown in a simple format	anxious and less confident

PS-4	A data analyst building a cosmetic dashboard	show meaningful insights about brands, price range, ratings, and product count	raw product data is difficult for users to interpret directly	customers need visual summaries and filters to make faster decisions	responsible to make the analysis simple and useful

Selected Focus Problem Statement

How might we help cosmetic shoppers quickly compare products by skin type, ingredients, price, rating, and brand so they can choose safe, suitable, and affordable cosmetics with confidence?
