

Project Design Phase

Proposed Solution Template

Date	04 July 2026
Team ID	
Project Name	Cosmetic Product Analysis Dashboard
Maximum Marks	2 Marks

Proposed Solution

S.No.	Parameter	Description
1	Problem Statement (Problem to be solved)	Users face difficulty understanding cosmetic product trends because information about brands, categories, prices and ratings is scattered and time-consuming to compare manually.
2	Idea / Solution description	Build an interactive Tableau dashboard that analyzes cosmetic product data through KPIs, filters, charts and stories. The solution helps users compare top brands, product categories, pricing and rating patterns.
3	Novelty / Uniqueness	The solution combines multiple cosmetic decision factors in one visual dashboard: brand availability, category mix, price range, ratings and guided story insights.
4	Social Impact / Customer Satisfaction	Customers and learners can make faster, clearer product decisions. Store managers can understand assortment gaps and improve customer satisfaction.
5	Business Model (Revenue Model)	The dashboard can support consulting, retail analytics, premium insights reports, affiliate product recommendations or subscription-based market analysis.
6	Scalability of the Solution	The dashboard can scale by adding new datasets such as sales, inventory, customer reviews, time trends and recommendation models.
