

Project Design Phase

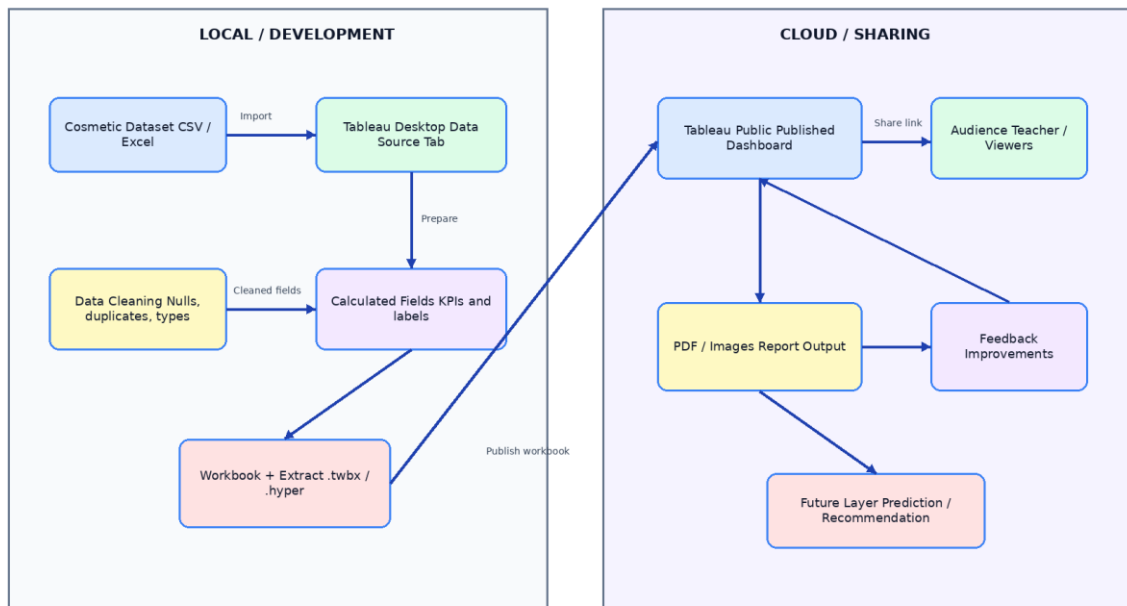

Solution Architecture

Date	04 July 2026
Team ID	
Project Name	Cosmetic Product Analysis Dashboard
Maximum Marks	4 Marks

Solution Architecture

This architecture bridges the business problem of cosmetic product comparison with a Tableau-based analytics solution. It shows local data preparation, visualization logic, storage, sharing and feedback flow.

Solution Architecture - Cosmetic Product Analysis Dashboard

Architecture Components

Layer	Component	Purpose
Data Layer	Cosmetic CSV/Excel dataset	Stores product attributes such as brand, category, price, rating and product name.

Preparation Layer	Tableau Data Source / Prep steps	Cleans data, fixes types, creates extract and prepares fields for dashboard.
Analytics Layer	Calculated fields and worksheets	Creates KPIs and visualizations for brand, category, price and rating analysis.
Presentation Layer	Dashboard and Story	Provides interactive filters, insights and presentation flow.
Sharing Layer	Tableau Public / PDF export	Publishes the workbook and supports project submission/reporting.
