Problem - Solution Fit Canvas: Cosmetic Product Analysis

1. CUSTOMER SEGMENTS

Cosmetic buyers, beauty store managers, product analysts, students creating a BI dashboard.

2. JOBS / PROBLEMS

Compare brands, categories, prices and ratings quickly; identify product gaps and best-performing segments.

3. TRIGGERS

Too many cosmetic options; need assignment/project insights; need to prepare marketing or inventory decisions.

4. EMOTIONS BEFORE / AFTER

Before: confused, overloaded, unsure. After: confident, informed, able to explain insights clearly.

5. AVAILABLE SOLUTIONS

Manual Excel filtering, online store filters, separate review pages, basic charts. These are slow and fragmented.

6. CUSTOMER CONSTRAINTS

Limited time, incomplete data, low budget, no coding skill, difficulty understanding Tableau calculations.

7. BEHAVIOUR

Users search by brand/category, compare price and rating, read reviews, and shortlist products manually.

8. CHANNELS

Online: Tableau Public, CSV/Excel, e-commerce sites. Offline: classroom review, store discussion, printed report.

9. ROOT CAUSE

Cosmetic data is scattered across many attributes; users need one visual view for product count, category and price patterns.

10. YOUR SOLUTION

An interactive Tableau dashboard with filters, KPIs, brand/category visuals, price/rating analysis and story view.
