Story Public Link	https://public.tableau.com/views/CosmeticproductAnalysis/Dashboard1?:language=en-GB&:sid=&:redirect=auth&:display_count=n&:origin=viz_share_link
Workbook / Profile Link	https://public.tableau.com/app/profile/kris.kumar2635/vizzes

Note: The actual Tableau Public URL was not provided, so editable placeholders are added. After publishing, replace the placeholder text with your real public links.

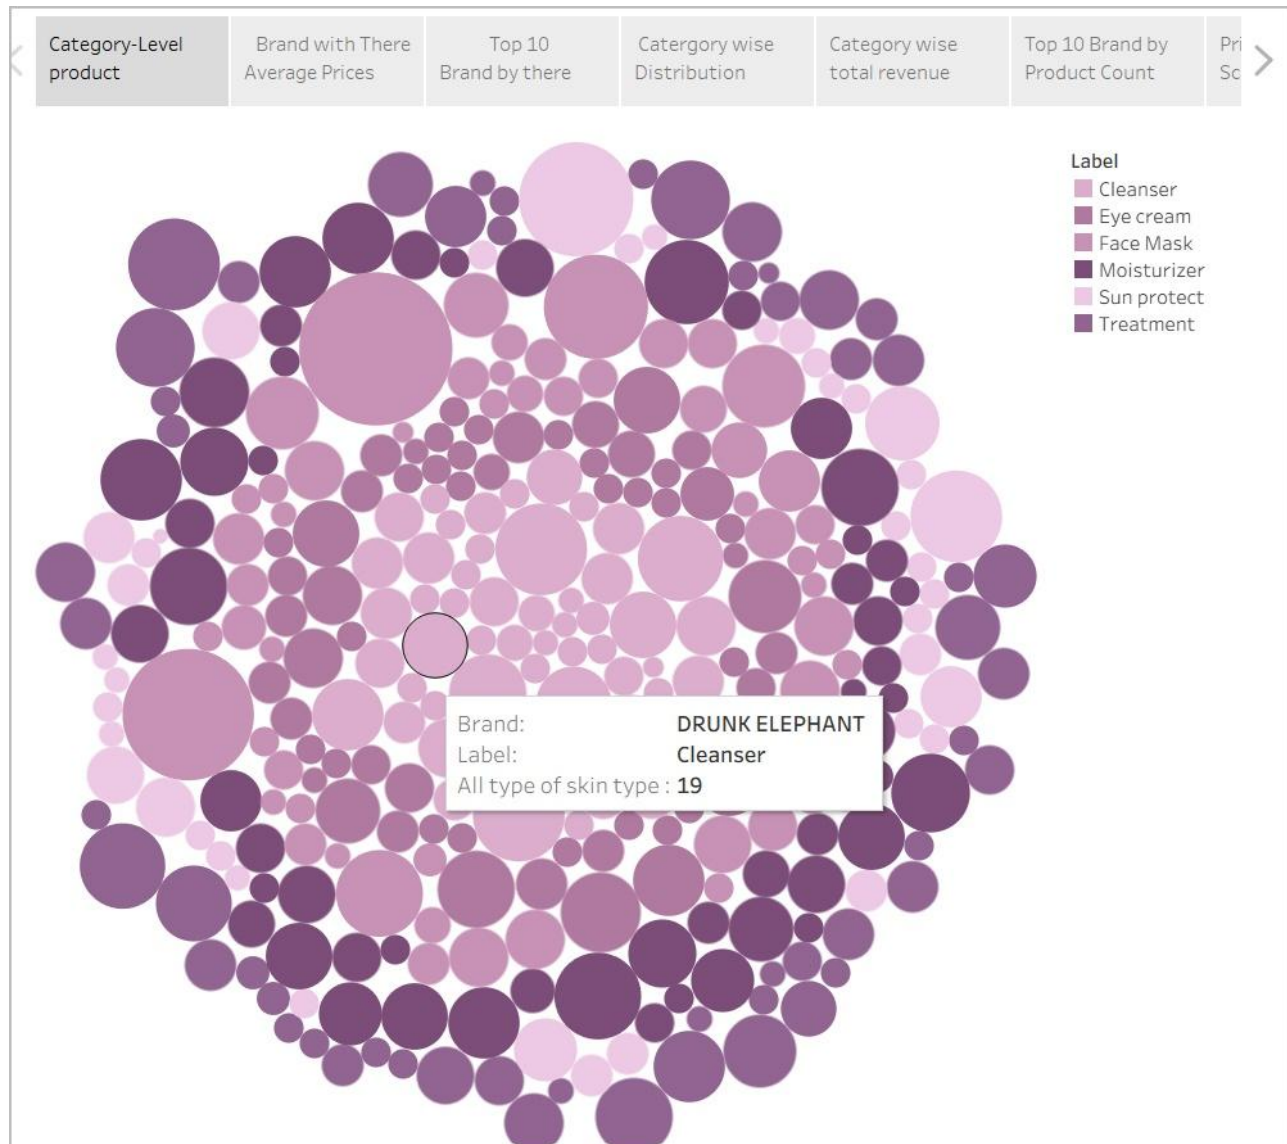

1. Dashboard Screenshot

The dashboard gives a complete overview of cosmetic product count, brand count, skin-type metrics, average product price, category-wise revenue, product distribution, brand ranking, and price vs rank relationship.

2. Story Screenshot

The Tableau story screenshot shows the category-level product analysis view. It allows the viewer to move through different story points such as category product distribution, brand average prices, category-wise distribution, category revenue, top brands by product count, and price vs rank scatter plot.

3. Tableau Public Links

Add your Tableau Public links in the table below after publishing the workbook/story. These links are required so the evaluator can open the live interactive dashboard and story online.

S.No.	Item	Tableau Public Link
1	Cosmetic Product Analysis Dashboard	Paste dashboard link here
2	Cosmetic Product Analysis Story	Paste story link here
3	Tableau Public Workbook / Profile	Paste workbook/profile link here

How to copy the Tableau Public link: Open your project on Tableau Public -> click Share -> copy the URL -> paste it in the table above.

Conclusion: The screenshots confirm that the cosmetic product dashboard and story were created successfully. The Tableau Public links will make the dashboard and story accessible online for review.
